CTWEA
CONNECTICUT WATER ENVIRONMENT ASSOCIATION

FLUSH HOUR

October 22, 2026 - Vernon, CT WPCF

You're invited to participate* in CTWEA's Flush Hour Networking Event on October 22nd!
Attend the facility tour and then meet up for networking at the Connecticut Valley Brewing Company.

The **Town of Vernon, CT WPCF** treats wastewater from Towns of Vernon, Ellington, Manchester, Tolland, and South Windsor and discharges to the Hockanum River. The facility has a permitted design flow rate 7.1 MGD ADF. A $65 Million upgrade with CT DEEP Clean Water Fund ~30% grant and remainder loan recently completed in February 2025.
Other Updates:

- New sludge thickening equipment to reduce sludge hauling and disposal costs
- Repurposed WPCF Sand Filter Building to house new cloth media disc filter system and meet ultra-low phosphorus levels
- Replaced chlorine disinfection with UV light disinfection system
- IFAS within existing aeration system added to biologically reduce nitrogen, phosphorus, and conventional wastewater pollutants
- New single 2000 kW generator with above ground fuel tank

**young professionals and WPCF/Collection Systems Staff may attend at a reduced cost!*

REGISTER ONLINE
Register by 10/14 - Space Limited.
